

Vibratory roller compacting the first layer of asphalt.

Project Locations:

1. Lyons Street (Callero Drive to Courtland Drive)
2. Maryland Street (Loras Lane to Lyons Street)
3. Courtland Drive (Lyons Street to N. Terminus)
4. Crain Street (Milwaukee Avenue to Merrill Street)
5. Merrill Street (Greenleaf Street to Crain Street)
6. Ozark Avenue (Main Street to Greenleaf Street)
7. Kedzie Street (Ottawa Avenue to Oriole Avenue)
8. Ottawa Avenue (Kedzie Street to Lee Street)
9. Neva Avenue (Birchwood Avenue to Harvard Street)
10. Harlem Alley (Harlem Avenue to Shermer Road)

Pay attention to traffic control devices and drive slow.

INTRODUCTION

Good news. **Your street is on the list to be repaired this year.** The project is part of an ongoing infrastructure improvement project that will improve services to Niles residents and businesses. The Village will be using local funds to perform the work and the general contractor will be Arrow Road Construction Company.

WHAT KIND OF WORK WILL BE DONE?

In general, the project will include:

- Drainage and utility structure maintenance and curb repairs as required.
- Full removal of the asphalt pavement.
- Aggregate base improvements and preparation
- Placement of new asphalt pavement.
 - Warning, paving oil is required and can be tracked on your driveway.
- Restoration. (Lawn restoration typically includes topsoil and seed).

WHEN WILL THE WORK START AND END?

Currently, there is a labor strike between the local 150 operator's union and the 3 largest quarry owners in the Chicagoland area. Due to the inability to get essential construction materials required for aggregate base, concrete, and hot-mix asphalt, the project timeline is unknown. Work will not begin until the strike is resolved.

There are multiple locations in the street/alley improvement project and the actual start date will vary depending on the location and weather. Saw cutting activities at your curb, sidewalk, and driveway are additional indications that work will begin at specific locations within the project area.

WILL STREET AND DRIVEWAY ACCESS BE AFFECTED?

The streets will generally be open to traffic. During working hours, traffic will be limited to local traffic only. The Contractor will post "No Parking" signs where they will be working. Residents will be allowed to park their vehicles on the street overnight.

During construction, your street, driveway, and sidewalk access will remain intact to the greatest extent possible. However, due to the nature of the project there will be instances where parking, driveway, and pedestrian access will be altered or lost for a period of time. You will be notified with further information if driveway access is interrupted.

WILL SERVICES TO MY HOME BE AFFECTED?

There may be times during construction where street access will be limited, but there will be no changes in your regular services such as garbage pick-up, mail delivery, and emergency services from the Police and Fire Departments. We will strive to make any disruptions as short as possible.

HOW CAN I GET MORE INFORMATION?
