

Mechanical Permit Application

AIR CONDITIONER:

- New installations of A/C Units are **NOT** permitted in any required side yard.

A/C Unit: New Replacement

Distance from side lot line: _____ Distance from rear lot line: _____

If the total proposed or existing tonnage capacity will be 8 tons or greater, noise level calculations must be prepared and may be obtained by the manufacturer.

- A separate ground wire shall be installed to the electrical panel.
- A disconnect shall be readily accessible of A/C unit.

FURNACE:

- Furnace shall be installed to the strict guidelines of the manufacturer's installation instructions, installation instructions shall be on site at time of final inspection.

ROOF TOP UNITS:

- A letter on contractor's letterhead needs to be submitted with permit application indicating that replacement unit weighs less than existing unit. If new unit is not lighter than existing unit or it is a completely new unit and roof openings are required than a structural engineer needs to stamp drawings of how roof will be altered to except new unit.

If you have any questions, please contact the Building Department.

John Montejo (847) 588-8067 Mechanical Inspector

REQUIRED INSPECTIONS: **Final Inspection**
